STANDARD PRACTICE
excellence everyday

FOR IMMEDIATE RELEASE

MedicalDirector adds Standard Practice widget to streamline everyday practice management tasks

Australia's leading clinical software provider, **MedicalDirector** and **Standard Practice**, the foremost provider of intelligent document management and integrated task management software for general practice and allied health practitioners have collaborated to develop a new application.

Standard Practice provides MedicalDirector users who have a Standard Practice licence access to important documents, files and reference materials managed in the Standard Practice 'intelligent document management' framework. This, along with easy access to an integrated daily task list comprising recurring duties, will help managers to ensure the practice is operating smoothly, efficiently and in a compliant manner consistent with accreditation standards.

"MedicalDirector welcomes Standard Practice to its growing portfolio of Sidebar partners. Practices using the Standard Practice solution have seen notable improvements in practice efficiency and process." **Phil Offer, MedicalDirector CEO**

"It made sense to create a widget for the MedicalDirector Sidebar, as this provides the practice seamless access to manage general operations at the point of care." **Tim Alberts, Standard Practice co-founder and Managing Director**

"Having practice policies and procedures integrated into MedicalDirector is a significant practice efficiency improvement and the natural next step for progressive medical practices. Rather than staff searching for written instructions or accreditation folders we can now have relevant practice information such as policies, procedures and instructions accessible directly from MedicalDirector. This integrated solution enables us not only fast access to relevant information but we can also be assured staff are accessing the most up-to-date protocols." **Katrina Otto, owner of Train Medical IT and approved MedicalDirector Trainer.**

The new Standard Practice widget provides access to documents, files and reference materials and enables daily tasks to be viewed and signed-off from the Task List directly via the MedicalDirector Sidebar. The Standard Practice Widget is a workflow companion to the Standard Practice Server or Cloud License.

Standard Practice benefits:

- **Centralised Management-** Documents, files and reference materials including in-house resources such as policies, procedures and forms, along with reference to external resources such as web pages, MSDS, on-line videos etc. are all contained in a centralised repository

MedicalDirector®

STANDARD PRACTICE
excellence everyday

- **Instant Access-** Provide staff with immediate access to documents, files and reference material through the one centralised, easy-to-use interface resulting in significant time savings on a day-to-day basis
- **Assign responsibility-** Managers can define, schedule and assign responsibility for all recurring duties (including linking reference documents for immediate look-up via daily tasks lists)
- **Provides staff with daily task lists** comprising due (or overdue) tasks, along with immediate reference to any supporting information
- **Various manuals for various roles** - Enable real-time, role-based manuals for a variety of staff members according to their role/s in the practice
- **Relevant and accurate-** Provide staff with the most concise, relevant and up-to-date information they require in performing in their role

About MedicalDirector

MedicalDirector has been supporting healthcare professionals and improving health outcomes for more than 20 years. We pride ourselves on developing solutions to help you achieve more in your day.

Formally known as Health Communication Network (HCN), we have our head office in Sydney and satellite offices in most major cities. We employ dedicated software development and customer care teams, committed to the delivery and support of new and enhanced products for healthcare professionals.

Our flexible systems are easy-to-use and created for the busy world of modern healthcare. With the latest evidence-based medicine at your fingertips, this is software designed to make your job easier.

Our team of developers use state-of-the-art technology to develop solutions specific to your needs. We've incorporated built-in backup and recovery tools, and provide a 7-day customer care service and dedicated helpline. We pride ourselves on offering cutting edge tools tailored to your requirements. To ensure we have access to the very best technologies, we've strategically partnered with proven software and service providers from across the healthcare industry.

About Standard Practice

Standard Practice has been supporting clinical customers all around Australia since 2005. Through its intelligent document management and integrated task management framework Standard Practice provides the fastest, easiest, most effective way for practice staff to access the information they need to deliver exceptional service every day.

Standard Practice is an Australian owned-and-operated company and continues to develop its innovative software in response to customer feedback and market requirements. Standard Practice offers on-premise and hosted solutions for its clinical customers on a monthly or annual subscription basis.
